

Power Surfacing

Fully Integrated with SolidWorks®

What Our Customers Are Saying

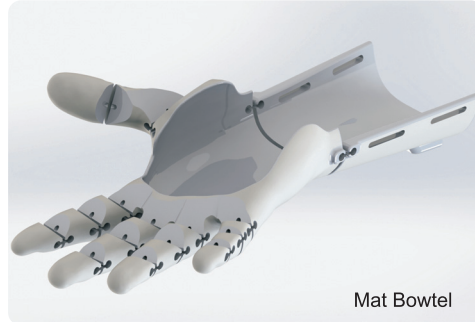

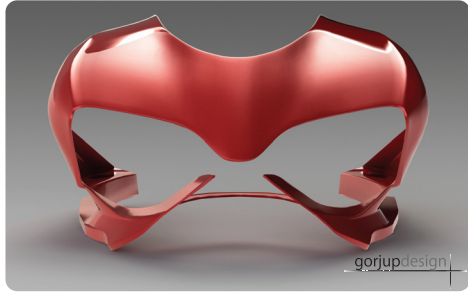

"I love your program, for me the Power Surfacing plugin represents the **most significant advancement in Solidworks® modeling capability in more than a decade!**"

James Bevan, Duncan Walton London

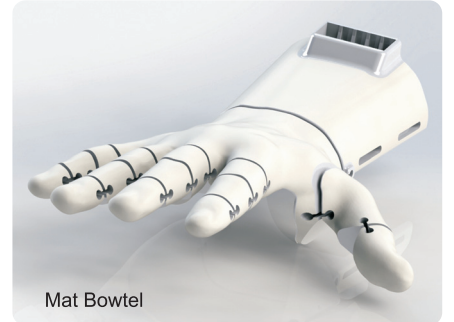

"time and money saver"

"Power Surfacing for SolidWorks® sure is time and money saver as you are able to design extremely fast and efficient in one software environment only. For that kind of design before Power Surfacing you needed several different softwares and a whole lot of time."

Ziga Gorjup, Gorup Design

Mat Bowtel

Mat Bowtel

"... this is even more **awesomer** than I thought :) **STOKED!**"

Adam O'Hern, EvD Media LLC

"A **great product!**"

Alex Jones, Cambridge Industrial Design

"**Great product by the way!**"

Adil Ali, BMW Group Design Works

"**Wow...Great Product!**"

Rob Rodriguez, SOLIDWORKS® blogger

"... all I can say is that **this is amazing!**"

Andreas Gkertos, Athens

"design in days what would have...taken months"

Power Surfacing RE has completely opened up new horizons for what I am able to design in within Solidworks®. I was able to design in days what would have previously taken months. It has allowed me to create organic shapes and edit scanned meshes with ease. With Power Surfacing RE, I have been able to take my prosthetic hand designs to a whole new level, and I am now only limited by my own imagination. I cannot thank nPower Software enough.

Mat Bowtell

ANDRIES VAN OVERBEEKE

"...it really opened up a whole new world of possibilities..."

Powersurfacing is really quite amazing to be honest..."

Benjamin Ngoma Rodahl

"incredibly powerful...tool"

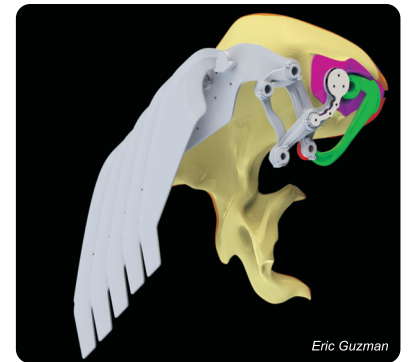

"For me personally Power Surfacing is an incredibly powerful and enabling tool, I'm very happy I came across it!"

"Power Surfacing makes the CAD process much more joyful, intuitive and playful and less tedious."

Andries Van Overbeek

"Love your product! Thanks again. **Such a pleasure to use.**"

Stuart Brown, 3D Engineers

Eric Guzman

"gains in productivity are truly epic"

"Power Surfacing has brought the fun back into surface design. Change existing Solidworks® surfaces and create new ones on the fly. Good price point. Easy to use. What is not to like with Power Surfacing? I believe that you cannot now count yourself as a Solidworks® surfacing professional unless you have Power Surfacing in your armory. The gains in productivity are truly epic. Power Surfacing is a true game changer for Solidworks® surfacing users."

Stuart Brown, 3D Engineers

"truly amazing...thing of beauty"

"Power Surfacing really puts me in the drivers seat, allowing me to plan ahead for how the shape gets designed... This is where Power Surfacing really is truly amazing...bring it into SW using Power Surfacing, is a thing of beauty. You get a clean solid that still can be manipulated inside SW."

Eric Guzman

"designs in a fraction of the time"

"...working with nPower Software, we are now able to use existing 3D models supplied by the manufacturer to produce new designs in a fraction of the time."

Ronald H. Ogletree, Sabre Design Technologies, LLC

"such a superior product"

"I can't give enough accolades to those guys for designing such a superior product...Working in Power Surfacing feels like modeling with clay...There doesn't appear to be any limit on what I can shape using this tool. Needless to say, when I showed my boss what it was capable of and what I was unable to do without it, he was sold."

"You don't have to take my word for it, though I'm happy to stamp my approval. Just try it for yourself and you'll find out what I did. How did we ever survive in the 3D CAD world without Power Surfacing before this?"

Danen Lynn, Gunwerks

"makes my job fun!"

"Thanks for the great products! Your Power Surfacing RE has been an amazing (and fun) tool to work with. Thanks again for the amazing software: Power Surfacing makes my job fun!"

Jesse Maier, Maier Manufacturing, Inc.

"COMPLETELY unlike anything you have EVER been able to do"

"Adding Subdivision Surface modeling capability to SolidWorks® in the most integrated and seamless way possible for a 3rd party, Power Surfacing for SolidWorks® is unique in the game-changing functionality it brings to SolidWorks®. The Sub-D approach to complex shape design is COMPLETELY unlike anything you have EVER been able to do in SolidWorks®, and yet it complements SolidWorks® so well. Their price point is remarkable given the functionality they are bringing to the table."

Jason Pancoast, CAPINC

"exceeded...our expectations"

"Power Surfacing has exceeded every one of our expectations for delivering fast results in a dynamic editing environment within SolidWorks®. We are such fans of the new plugin..."

Raquel Rabago, Tovolo

"As an industrial designer I have been dreaming of a tool like this for years"

Eric Lagman
